

# SPIER WINE FARM

Stellenbosch, South Africa

## Great Returns that's Good for the Earth, Too

Spier is an ethically, environmentally, and socially conscious farm in the Stellenbosch Winelands. With more than 300 years of good food, wine, hospitality and arts, this 153-room property spans 620 hectares (6.2 kilometers) and has been family owned since 1993. Spier strives to find innovative ways for business success in balance with society and the environment. We use biodynamic farming practices to restore fertility to the soil. We clean and re-energise wastewater which is then used to irrigate the gardens and grounds – the first of its kind in South Africa.
